

Profile

Driven analyst and team player. Modelling, optimisation, and forecasting specialist.

Education

THE UNIVERSITY OF SYDNEY

FEB 2021-JUN 2025

- B Science B Advanced Studies, Honours in Statistics: Major in Financial Mathematics and Statistics + Econometrics: HD undergraduate WAM, Honours Thesis: Forecasting breakdowns on large Scottish water pipe network (300,000 nodes).
- George Allen Scholarship For Honours In Mathematical Statistics, Deans List For Academic Excellence x2, Academic Merit Award, Denison Research Scholarship, Dalryell Scholarship.

SYDNEY GRAMMAR SCHOOL

FEB 2015-OCT 2020

- 98.95 ATAR, HSC All Rounders Award.
- Captain of Cricket, GPS Representative Cricket Team 2020.

Professional Experience

QUANTITATIVE ANALYSIS INTERN AT LANIAKEA FUNDS (WRITTEN REFERENCE BELOW)

DEC 2024-JAN 2025

Development of a Python, Streamlit trading tool which utilises Bloomberg and Interactive Brokers APIs to price financial products and identify profitable opportunities in real time.

DATA MODELLING ANALYST AT CROWN RESORTS

APRIL 2025-SEP 2025

Production of a restaurant covers forecasting model which improved upon previous consultants' work on optimising rostering. I also created a statistical method to determine the effectiveness of business promotions.

MODELLING AND OPTIMISATION SPECIALIST AT ACOR CONSULTANTS

APRIL 2025-JUN 2025

Creation of reusable Microsoft Excel software which models safe firefighting attack points for a given industrial site. It uses projectile motion equations combined with input topographical data and fire load analysis.

DATA MODELLING INTERN AT WOLFDEN BETTING (WRITTEN REFERENCE BELOW)

JUN 2024-SEP 2024

I developed a Python (Pandas) machine learning model that predicts the probability of greyhound wins. I handled GB worth of historical race and price data to create, optimise and test custom machine learning models. Backtesting showed that my model had 'edge' over market predictions as measured by return on investment per bet.

DATA SCIENTIST AT CONSOLIDATED FOOD CO (WRITTEN REFERENCE BELOW)

JAN 2024-JUN 2024

I created Python price forecasting software for beef supply chain managers Consolidated Food Co. Over 20 prediction backtests on all the firm's products' prices, my model beats that of widely used agricultural consultants by 0.4% on average. The model is a time series forecasting function which fits into CFC's cloud computing system.

INTERNSHIP AT MYCELIUM (KOJI)

JAN 2022-FEB 2022

Interning at Koji, the venture capitalist arm of a Blockchain firm called Mycelium, provided me with exposure to investment decision making and cutting edge technology. I also learnt valuable Microsoft Excel skills.

Other Interests

SURFING, TENNIS, CRICKET, AFL, CHESS, LITERATURE, TRADING PROJECTS

Jackson Watson

jacksonwatsonjw08@gmail.com

To whom it may concern,

Jackson spent two months during the '24/'25 Australian summer working with our group. From the day he started until the day he left he was genuinely fascinated with financial markets, data science, quantitative trading models and ultimately financial strategy discovery and development. This showed in his dedication to work day and night, including being in the office over weekends at his own discretion.

Whilst with us, he completed a strategy development project for us. This included a Streamlit app that utilizes Bloomberg and Interactive Brokers APIs to price financial products and identify trading opportunities.

We wish Jackson all the best with his future endeavors.

Sincerely,

901 Funds Manager
Laniakea Funds Manager

I am writing this letter of recommendation for Jackson Watson, who who was hired as an intern for Wolfden Pty Ltd from June 1 2024 til September 6 2024.

As a professional trader and market analyst with 30 years of experience, I have had the pleasure of working with many talented individuals, and Jackson stands out as an exceptional data analyst and programmer.

During his time with us, Jackson demonstrated a remarkable ability to handle and process large volumes of data efficiently. His expertise in data management and analysis proved invaluable in our fast-paced trading environment, where quick and accurate insights are crucial.

Jackson's greatest strength lies in his contribution to our team's development of probabilistic machine learning models. He showed a deep understanding of complex algorithms and their practical applications in market analysis.

Some of Jackson's key contributions include:

1. Streamlining our data pipeline.
2. Developing a novel approach to feature engineering that contributed to enhancing our machine learning models' accuracy.
3. Collaborating effectively with our quantitative analysts to implement and refine various probabilistic models.
4. Demonstrating an understanding and ability to explain complex technical concepts to non-technical team members, facilitating better cross-department communication.

Jackson's technical skills are complemented by his strong work ethic, attention to detail, and ability to work well under pressure. He consistently met tight deadlines without compromising the quality of his work.

In conclusion, I wholeheartedly recommend Jackson Watson for any role requiring advanced data analysis and machine learning expertise, particularly in high-stakes environments. His combination of technical prowess and professional conduct would make him an asset to any organization.

Please feel free to contact me via email if you require any further information.

Sincerely,

Kingsley Bartholomew

To whom it may concern – Jackson Watson

I am delighted to write this reference for Jackson.

I have had the pleasure of knowing Jackson for the last 10 years – initially whilst he was at Sydney Grammar School with my son – and professionally for the last 12 months as he has worked in my business while he finishes university, as an Associate Data Analyst.

Jackson is a great guy who is interested and interesting. His determination to understand, to solve and provide actionable outcomes for our business is impressive. He is highly intelligent and analytical. He is a doer.

In a relatively short period of time, Jackson has produced price forecasts for all our major products. Over 20 prediction back tests, his price algorithm beats that of widely used agricultural consultants by 0.4% in terms of average accuracy. The fact that we now produce in-house forecasts will give us an edge over our competition in attracting new clients.

Jackson is in the process of implementing his Python program into our cloud computing system. It will automatically update fortnightly for salesmen and is displayed in an AWS QuickSight dashboard.

In addition to that Jackson brings his quick wit and sense of humour to the office making him a popular team member. We enjoy having Jackson in the office.

I have no hesitation in recommending Jackson to you and am confident that he will add value to whatever he puts his mind to...

I would be more than happy to meet with you to discuss Jackson in more detail if you would like.

Sincerely,

Matt Toll

CEO – Consolidated FoodCo
